

The Path to the Meme Crypto Throne

1. Introduction & Vision

In the highly dynamic world of meme cryptocurrencies, **DOGKING** emerges not merely as a participant, but as a revolutionary force poised to carve its own history. Inspired by the strength, courage, and loyalty of a Pitbull, **DOGKING** transcends the simple definition of a "meme coin." It is an ambitious declaration, Launched on Sunday, July 27, 2025, at exactly 12 PM, with the slogan "The Shiba Inu Destroyer". A manifesto to seize the throne and redefine what it means to be the undisputed king in the meme crypto realm.

Our vision extends far beyond fleeting competition. It is about building a solid and enduring foundation. We aim to surpass and dominate legacy players like Shiba Inu, not with temporary euphoria, but with a robust foundation, a secure ecosystem, and a sustainable model. **DOGKING** is a commitment to innovation, security, and organic community growth, ensuring that every step we take is a leap forward toward a stable and prosperous future for all token holders.

2. About **DOGKING**

DOGKING's identity is meticulously crafted to reflect its core principles. The project is proudly symbolized by the noble Pitbull, a breed revered for its unwavering strength, profound courage, and fierce loyalty. This visual identity, complemented by a majestic crown and a commanding sword, serves as a powerful declaration of our ambition to ascend to the pinnacle of the meme crypto world. It represents our commitment to building a project that is not only robust and formidable but also possesses the integrity and leadership befitting a true king. This symbolism underscores our dedication to a powerful, secure, and dominant presence in the market.

Technologically, **DOGKING** is strategically engineered to thrive in the modern blockchain ecosystem. It is built upon the **Solana** network, a choice that is far from arbitrary. We leverage Solana's unparalleled speed, exceptional efficiency, and remarkably low transaction costs to ensure that **DOGKING** is accessible and scalable for all users. This foundational technology allows for seamless trading and robust ecosystem growth, providing a superior experience that a burgeoning crypto community demands. Our commitment to Solana is a testament to our focus on long-term viability and performance.

To safeguard our community from the pervasive threat of scams, we maintain a singular and definitive point of truth. The one and only official **DOGKING** contract address is: **8jqHkknDRgoeQYn77CEoHrW4FJoE2pSjg4gULLApump**. We issue this as an official and urgent warning to all potential and current holders: please exercise extreme caution and verify this address meticulously before any transaction. Any other contract address purporting to represent **DOGKING** is unequivocally a fraudulent token, and we will not be held responsible for any losses incurred from engaging with such scams.

3. Tokenomics & Security

At DOGKING, we have established **transparency and trust** as the fundamental pillars of our entire project. We understand that in the dynamic and often volatile crypto industry, building public confidence is paramount. Therefore, every decision we have made regarding our tokenomics and security is meticulously designed to protect and empower our community.

- a. Fair Launch:** DOGKING was launched with a strict "Fair Launch" philosophy. This means there were no private **presales** or exclusive **airdrops** to a small group of early investors. This decision was made to ensure a truly equitable and fair distribution of tokens for everyone, preventing any single entity from gaining an unfair advantage. We have deliberately and unequivocally avoided schemes commonly employed by fraudulent projects, such as requiring users to connect their crypto wallets to a website we created. This action serves as our explicit guarantee that we will not exploit security vulnerabilities to harm our community.
- b. Limited Developer Holdings:** As a testament to our unwavering commitment to decentralization and anti-manipulation, the token ownership held by our development team will never exceed **5%** of the total supply. This limitation is a crucial preventative measure to safeguard against market manipulation and the potential for a *rug pull*, where developers suddenly sell off their tokens en masse. By restricting our holdings, we ensure that DOGKING's success is not contingent on centralized control, but rather on the strength, growth, and solidarity of our community.
- c. Locked Liquidity:** The security of our holders' funds is our highest priority. To that end, DOGKING's liquidity is automatically and securely locked by a reputable token generation platform, specifically **Pump.fun**. This mechanism ensures that the funds pooled for liquidity cannot be withdrawn by the developers at any time. This provides a robust guarantee of security and demonstrates our seriousness in building a sustainable project that is free from fraudulent risks.

4. Ecosystem & Real World Asset (RWA)

DOGKING distinguishes itself from the vast majority of meme cryptocurrencies by transcending a purely speculative value proposition. We are dedicated to building a tangible and integrated ecosystem, a commitment that is solidified through our innovative **Real World Asset (RWA)**. This RWA serves as a testament to our long-term vision, providing a genuine utility and a fundamental value proposition that underpins the token's existence. It is this strategic integration that elevates DOGKING beyond a simple meme coin, establishing it as a project with real purpose and a serious roadmap for growth.

The cornerstone of our ecosystem and our flagship RWA is **Mynetworkly.com**. Mynetworkly, or simply "Mynet," is a purpose-built social media platform designed exclusively for the global cryptocurrency community. Unlike generic platforms, Mynet provides a dedicated and secure environment where crypto enthusiasts, investors, and developers can connect, share invaluable insights, and stay abreast of the latest market intelligence. The platform's primary objective is to serve as a catalyst for the exponential growth of the DOGKING community, fostering a vibrant and engaged space for members to interact, collaborate, and build a collective future. Through Mynet, we are creating a centralized hub for decentralized minds, ensuring that our community is not only active but also well-informed and deeply connected.

As a core component of this ecosystem, we have integrated a strategic rewards system. As a token of our profound appreciation for their contribution and engagement, active users on Mynet are provided with unique opportunities to earn bonus **\$DOGKING** tokens. This initiative is designed to incentivize participation, reward loyalty, and strengthen the bond within our community. By directly linking the utility of the platform to the value of the token, we create a virtuous cycle of growth where community engagement directly contributes to the success of the DOGKING project.

5. Roadmap

Our journey is meticulously articulated through a strategic roadmap, designed to serve as a comprehensive blueprint for the sustainable growth and evolution of the DOGKING project. This plan is not merely a list of milestones but a carefully considered strategy focused on three core pillars: robust community growth, seamless market integration, and the continuous development of utility. Each phase represents a critical step towards realizing our ultimate vision of becoming the undisputed leader in the meme crypto sector.

✓ Phase 1 — The Launch & Foundation of the Community

Status: Completed (July 27, 2025)

Achievements: This initial phase was centered on establishing the fundamental infrastructure of the DOGKING project. We successfully executed a fair launch of the token on the high-performance Solana network, ensuring equitable distribution from the very beginning. Concurrently, we achieved our first listing on the Pump.fun platform, providing initial liquidity and accessibility for our early adopters. Furthermore, this phase saw the successful establishment of our official social media channels, including our dedicated community platform on Mynetworkly, which laid the groundwork for building a solid and engaged community.

✓ Phase 2 — Ecosystem Integration & Strategic Marketing

Target: Q3 2025

Goals: Building upon our foundational success, this phase is dedicated to expanding our presence and enhancing our technological integration within the broader Solana ecosystem. We will pursue listings on major decentralized exchanges (DEXs) such as Raydium and Jupiter Aggregator to significantly increase liquidity and trading volume. A critical technical goal is the update of our token metadata on the Solana SPL Token Registry, which will ensure proper visualization and recognition across all Solana-based wallets and platforms. To further enhance user experience, we will focus on seamless integration with popular wallets like Phantom and Solflare. Concurrently, a robust global marketing campaign will be launched, involving strategic collaborations with key opinion leaders (KOLs) and influencers to amplify our brand's reach and attract new members to the #DOGKINGArmy.

✓ Phase 3 — CEX Expansion & Utility Activation

Target: Q4 2025

Goals: This phase marks our transition from DEXs to the global stage of centralized exchanges (CEXs). Our primary objective is to secure a listing on a reputable CEX, such as Indodax, to provide a new level of accessibility and trust for a wider audience of investors. To manage token supply and increase long-term value, we will implement a dynamic token burn strategy, directly linked to our

trading volume. Most importantly, this phase will see the official launch of our flagship Real World Asset (RWA) — the Mynetworkly platform — complete with its integrated token reward program, thereby providing tangible utility for our holders and solidifying the ecosystem's value proposition.

✓ **Phase 4 — The Dawn of Reign**

Target: Q1 - Q2 2026

Goals: This final phase is dedicated to securing DOGKING's position as a global leader. We will introduce a community governance model, empowering our token holders to participate in key decisions regarding the project's future development and direction. Strategic partnerships with other established crypto projects will be forged to expand our network and explore new collaborative opportunities. To further enhance brand recognition and loyalty, we will launch an official line of DOGKING merchandise. Ultimately, this phase is about solidifying our dominance, demonstrating that a project built on transparency, utility, and a strong community can indeed surpass and reign supreme in the meme crypto sector.

Regards,

MIMI
DOGKING
